Description

MILLEVERTUS BREWERY

Established in a privileged countryside area our brewery has been created in 2004.

After having spent 25 years in finance as a forex trader together with my wife we decided to change completely our professional direction to start up a craft brewery.

Since then the constant search for quality and flavor is our main guide.

Carried by our popularity both in Belgium and abroad our brewery grew rapidly winning several awards both in Belgium and in French beer contests.

Our current production reaches 1.600 hectoliters and due to a very flexible production plant we have the capacity to go quickly to the double.

MILLEVERTUS BEERS

We offer a wide range of character beers, all brewed in the strictest Belgian brewing tradition.

Our range goes from light to strong beers, from blond to black.

Some of them are traditional abbey style beers :

- Bella Mère (blond),
- Mère Vertus (triple),
- Douce Vertus (malted brown) which was awarded "Best Belgian Beer of Wallonia 2012-2013,
- and some are more innovative like our saffron beer, *La Safranaise* which is brewed with saffron produced nearby, our exotic peppers beer, *La Poivrrote* which is unique on the market or our *Fumette*, a smoked beer awarded twice (see prizes attached).

Chefs and restaurants offer more and more food pairing and our beers have got a great success in these food-beers combinations.
